

Change the way you look at Zirconia restorations.

We know each patient's teeth are unique. That's why we put our trust in Zenostar®—metallic-free, single-piece, full-contour zirconia crowns and bridges without a ceramic veneer. Made to withstand chewing force, these long-lasting, translucent restorations can be individually matched to any tooth shade for a perfectly natural appearance. Plus, the latest technology guarantees a perfect fit—every time!

- ✓ Superior personalized service & support
- ✓ Accurate & precise craftsmanship
- ✓ Affordable, competitive pricing
- ✓ Exceptional quality & attention to detail

For more than 30 years, Seattle Dental Arts has been providing personalized, efficient service focused on increasing patient satisfaction. We use only the finest materials available and fabricate each and every restoration locally.

SDA TEAM:

I started my schedule this afternoon with a large amount of trepidation because I had seven difficult units to seat on three patients—an implant crown, four anterior emax crowns and two lower posterior crowns. I am all finished with my schedule and I am a very pleased and relaxed. All of the units fit beautifully, had great contacts, beautiful shades and vitality. Most importantly, there are happy patients attached to those crowns.

Thank you for doing such a great job on my cases. Your artistry and attention to detail is sincerely appreciated. Even after practicing over 40 years, it still gives me reassuring confidence to be able to trust that my lab support is as sophisticated as yours with such a high level of finesse and care. Please continue your great work. It means a lot to me.

Sincerely,
Jerry Becker, Shoreline
